

Index to Interment Records St. Agnes Cemetery Menands, NY

A multi-volume index of interments in St. Agnes Cemetery

The Founders' Hill Restoration Project is a multi year effort undertaken by St. Agnes Cemetery to restore and preserve the landscape, monuments, and historic records associated with burials dating back to 1868.

In the area of preservation of records, St. Agnes Cemetery has partnered with the Troy Irish Genealogy Society to assist in scanning and transcribing the fragile cemetery interment books. Each interment index will then be available for review on the Troy Irish Genealogy website. The on-line index of these interments will show the name, date of death and age of the individual.

Genealogy and family researchers will then be able to request additional information on their family members which may be available in the St. Agnes Cemetery records.

Copies of additional information in the cemetery records that may be of interest to genealogy and family researchers can be ordered from the St. Agnes Cemetery Office for a fee of \$5.00. This additional information may include items such as:

1. Where individual was born.
2. Where individual died.
3. Residence of individual at time of death.
4. Date of interment.
