

Legacy tip - memorized dates/places

If you are retyping the same date or place for several individuals, you are unnecessarily wearing out your keyboard.

As you enter dates and locations into date and location fields in Legacy, the most recent ten (10) dates and place names are remembered and can be quickly displayed in a popup list and selected.

Also to display the list of the last ten (10) place names, for example, right-click on the field label, (*in*), to the left of any location field. From the resulting popup list of place names you can select one to fill into the location field by clicking on it.

In the image below, the popup list was displayed after right-clicking on the *born* label.

The screenshot shows the 'Individual's Information' window for Asa Clark Brown. The 'Born' field is highlighted, and a popup list of dates is displayed. The dates listed are: 11 Oct 1792, 7 Jul 2006, 19 Dec 1986, 24 Mar 1982, and Feb 2007. The '11 Oct 1792' date is selected. Below the popup list, there is a table of events and facts for Asa Clark Brown.

Event/Fact	Date	Location/Notes
Alt. Birth	[[11 Oct 1792]]	
Disproven	Abt 1895	
Census		(Clear all memorized dates)
